

SANTA DOMINGO WATER LINE PIPES WILL BE SUPPLIED BY TURKISH GIANT

**Dizayn Group Pipes will bring solution to drinking water difficulties of Santa Domingo,
the capital City of the Dominican Republic**

Dizayn Group, which is Turkey's most important brand in heating and sanitary sector, exports to the Dominican Republic pipes and fittings that will be used in the capital city Santa Domingo's infrastructure Project called " **En Construccion by Pass Sistema Valdesa-Santa Domingo**".

The PE pipes with 1600mm diameter which will be used for the drinking water project in Santa Domingo have the feature to be the first in the world.

The Dominican authorities preferred this world record holder pipes because they are resistant to disasters. Dizayn Group authorities stated.

" After a period of ongoing talks we came to a result and export is done in April 2009 in Tekirdağ- Akport Harbour.

Resistant to natural disasters

The Dominican Republic is placed in the Caribbean Hispaniol island and is exposed to continious hurricanes which causes seriously water shortages that affects life.

While transporting clean water is a serious problem in the Dominican Republic, it is given great importance to this new

project. Because this drinking water project will bring a solution to this clean water problem in the city.

Hakan Özdemir Vice President of Dizayn Group, pointed out the clean water pipes that will be used for this project are pressure pipes. He said " the features of pipes we exported are under pressure not breakable of join and don't leak. This high chemical resistance pipes are also resistant against natural disasters. He said; " Because of the high production technology standarts, these pipes don't crack and have a high resistant against blows. These pipes are suitable for the land structure in Santa Domingo where they will be implemented and they are certainly not affected by sunlight."

About Dizayn Group

Dizayn Group was founded in 1987 with the objective of developing and carrying out projects in heating and plumbing sectors. In September 1992, Dizayn Group started producing under-floor heating pipes and indoor plumbing pipes called PP-R. Today Dizayn Group produces more than 4000 types of products using 23 complete systems.

As the result of giving importance to R&R works, Dizayn products which have quality certifications are exported to more than 80 countries are produced with high technologies they don't have alternatives in the world. Moreover, Dizayn Group with 85 patents is one of most productive technology company in Turkey and is rewarded by the Turkish Patent Institute.

Dizayn Group is growing with it's national and international investments every day and developing also. So far Dizayn products are preferred for different international projects like Palm Islands, Burj Dubai Old Tower, the Nile River Underwater Crossing Project and Hong Kong Island Project and Izmir Great Canal Project.

Dizayn Group Chairman Ibrahim Mirmahmutoğulları represented Turkey successfully in 2002, at the World Young Entrepreneurs contest in the Philippines. He was rewarded with the Grand Prize.

He is also the founding member and president of the International Technology Union (UTB) in Turkey.
